Title: Allergen Order Handling
Category: Food Safety
Version: 1.0
Active: true

Content:

Purpose: Prevent allergic reactions by preparing allergy orders safely.

1. When a guest mentions an allergy, repeat the allergy back to confirm it and mark the order ALLERGY in the point-of-sale system.

2. Wash hands and put on new gloves before preparing the order.

3. Use a clean pitcher, a clean blender jar, and utensils that have been washed and sanitized.

4. Use the dedicated purple-handled tools for nut-free and dairy-free orders.

5. Do not guess about ingredients. If you are unsure whether an item contains the allergen, tell the guest and notify the shift manager.

6. Hand the order to the guest directly and confirm the allergy again.
