Title: Espresso Machine Daily Cleaning
Category: Equipment
Version: 1.0
Active: true

Content:

Purpose: Keep the espresso machine clean so drinks taste consistent and the equipment lasts.

1. At closing, remove the portafilters and rinse them in hot water.

2. Insert a blind basket, add one scoop of espresso machine cleaner, and run the backflush cycle five times.

3. Rinse by running the backflush cycle five more times with water only.

4. Purge and wipe each steam wand after every use and again at closing.

5. Wipe the group heads, then empty and rinse the drip tray.

6. Record the cleaning on the Equipment Cleaning Log.
