Title: Spill and Slip Hazard Response
Category: Safety
Version: 1.0
Active: true

Content:

Purpose: Prevent slips and injuries from spills.

1. Place a wet floor sign at the spill immediately.

2. Stay near the spill or ask a coworker to watch it so no one walks through it.

3. Clean liquid spills with a mop. Use a broom and dustpan for broken glass or ceramics. Never pick up broken glass with your hands.

4. Leave the wet floor sign in place until the floor is completely dry.

5. If anyone slips or is injured, provide first aid if needed and notify the shift manager following Manager Escalation Procedures.
